Continuation Sheet (PTOL-303)

Application No.

Continuation of 3. NOTE: Providing the data input to the plurality of shift registers is a new issue which requires further search. In response to the applicant's argument that providing the data input to the multiple shift registers is inherent in the claims (see page 7), the claims language in the response filed July 28, 2005 is not sufficient to require that the data input be provided to each of the plurality of shift registers. Based on the claims language, the input data can be provided to just one of the plurality of shift registers.

Furthermore, in claim 1, line 5 of the amendment filed November 30, 2005, "the data input" should be "the input data" in order to be consistent with the terminology in claim 1, line 2.
